

XPANDER

A Brand New Journey

Introducing the new XPANDER.
Completely redesigned for the modern world,
the XPANDER enhances your journey,
no matter where or how far you go.
With exceptional comfort and
convenient features for every passenger,
and capability you can count on,
the XPANDER provides
an enjoyable driving experience
for the whole family.

Drive your Ambition

Note: Some equipment may vary by market. Please consult your local MITSUBISHI MOTORS dealer/distributor for details.

A pleasure for all senses.

Refinement that makes you smile.

The modern and stylish interior lined with soft-touch materials pleases all the senses. Enjoy the dependable SUV feel of the solid and sleek instrument panel that expands from end to end along a sturdy horizontal axis to provide a clear front view that makes driving more enjoyable and stress-free. Conveniences like the new digital cooler panel that's easier to use and 2nd row armrest cup holders provide everyone with a pleasant drive.

Note: Some equipment may vary by market. Please consult your local MITSUBISHI MOTORS dealer/distributor for details.

High ground clearance and high driving view

Top-level ground clearance and a high driving position allow confident and comfortable driving on bumpy or uneven roads and a clear view of the road ahead.

Eye point height:

1,340 mm

Minimum ground clearance:

225 mm

*CVT model: 220mm

High-efficiency Continuously Variable Transmission [CVT]

The high-efficiency CVT provides an ideal balance between fuel efficiency and driving power with smooth gear shifts. Step-up shifting provides a crisp acceleration feel that's powerful and sharp.

Smoother, smarter, and more confident.

Put your mind at ease.

Active Stability Control [ASC]: The control capabilities of ASC are supplemental only. Please drive safely and never rely solely on these functions whilst driving. Be sure to use the same specified type and size of tyres on all 4 wheels. Do not instal any aftermarket limited slip differential on your vehicle.

Anti-lock Brake System [ABS]: ABS can help the driver maintain control whilst braking, but is never a substitute for safe driving. ABS does not always reduce stopping distances, which may be influenced by many factors including road surface conditions and friction between the tyres and road surface.

Please see the owner's manual for additional information.

Note: Some equipment may vary by market. Please consult your local MITSUBISHI MOTORS dealer/distributor for details.

Active Stability Control [ASC]

Maintain control on slippery roads and around turns. ASC automatically adjusts engine output and applies the brakes where needed to prevent skidding when the tyres lose their grip.

Anti-lock Brake System [ABS]

Brake safely on slippery roads. ABS helps the wheels from locking up when braking.

Supports everything you love to do.

Spacious luggage area

Enjoy your favourite activities with the spacious luggage room. The wide opening makes loading and unloading easy for anyone. What's more, convenient compartments and underfloor storage help keep your smaller items organised.

Underfloor luggage area storage

Rear luggage compartment

Convenient storage & power outlets for all passengers

Keep your interior clean and organised with smart storage solutions. With power outlets on every row, all passengers can keep their smartphones, tablets, or other electronic devices charged.

*DC12V USB adapters not included.

Spacious cabin and versatile seating arrangements

Flexible seating configurations provide support for all your favourite activities. Load items easily by folding down the second and third row seats, or fold the second row armrest to store long items.

FEATURE HIGHLIGHTS

Safety

RISE body
RISE (Reinforced Impact Safety Evolution) body helps keep everyone safe in the event of a collision by efficiently absorbing energy and maintaining high cabin integrity.

Driver and passenger SRS airbags
The driver and passenger SRS airbags protect front occupants by absorbing impact force to help keep them safe in frontal collisions.

Pretensioners
Pretensioners help reduce frontal impact force in frontal collisions when used with seatbelts. Front seatbelt pretensioners automatically tighten in a collision to help restrain front occupants.

Hill Start Assist [HSA]
For peace of mind during stop-and-go uphill driving, HSA maintains braking force until the accelerator is pressed to prevent the vehicle from rolling backwards.

Emergency Stop Signal system [ESS]
Prevent being rear-ended. ESS automatically flashes the hazards during sudden braking or when ABS is activated to warn following vehicles.

Utility

Tilt and telescopic steering wheel
Enjoy your drive in comfort. The steering wheel can be adjusted up, down, forwards, and backwards to find the ideal driving position for any driver.

Electric parking brake (Brake auto hold)
Turn Electric parking brake on/off with a simple switch. When Brake auto hold is active, the vehicle will temporarily stay in place even with your foot off the brake pedal.

Digital cooler panel
The new digital cooler panel isn't just stylish but intuitive and easy to use.

Rear manual cooler
Keep everyone comfortable even in hot weather. Rear passengers can conveniently use the knob to control airflow.

USB port for charging for 2nd row seat (Type A and C)
Rear passengers can keep their electronic devices charged with the USB ports for charging conveniently placed behind the floor console.

Keyless Operation System [KOS] + engine switch
Conveniently unlock the doors by pressing the switch on the front doors or tailgate whilst carrying your key fob on you. Once inside, start the engine by pressing the switch whilst holding the brake pedal down.

Mechanism

Responsive 1.5L MIVEC engine
The spirited 16-valve DOHC engine with advanced MIVEC* puts ample power at your command – more than enough to carry seven adults up steep mountain roads with ease.

Front suspension

Rear suspension

Flat and comfortable ride
Enjoy your drive in comfort. A reinforced suspension system with high-performance shock absorbers provides stable handling and exceptional ride comfort. To achieve a surprisingly quiet interior, certain areas of the body are covered with high-performance sound absorbing and vibration blocking material.

*Mitsubishi Innovative Valve timing Electronic Control system

Exterior

LED headlight (High/Low beam)
Both the high and low beams are LED-powered for improved brightness and illumination.

Rear combination light
Be seen better in the dark. The rear combination lights with LED help keep your vehicle clearly visible from behind.

Shark-fin antenna
The shark-fin antenna's sharp design complements the vehicle's dynamic exterior styling.

Hill Start Assist [HSA]: HSA is not a substitute for safe driving. Never rely solely on this function whilst driving on steep roads. Your vehicle may move backwards if the brake pedal is not sufficiently depressed, if the vehicle is heavily loaded, or if the road is very steep or slippery. This function is not designed to keep the vehicle stopped in place on uphill slopes for more than 2 seconds. Do not rely on this function to maintain a stopped position as an alternative to depressing the brake pedal. Please see the owner's manual for additional information.

WARNING

·Individuals who use implantable pacemakers or implantable cardioverter-defibrillators should keep away from the Keyless Operation System [KOS]. The electromagnetic waves used in the KOS may affect the operation of implantable pacemakers or implantable cardioverter-defibrillators.

·Individuals using other electro-medical apparatuses should check with the manufacturer of the apparatus to confirm the effect of the electromagnetic waves used by the KOS, as the electromagnetic waves may affect their operations.
